FOR MYSORE STATE

(Signature)...

Copy of petition from the Public of Oojini Taluk, Bellary District dated 21.1.52 to the Minister Chief Minister, Madras.

Sub:- Oojini village in Kudligi Taluk Bellary District
and surrounding villages- No rains- No work for poor-
No fodder for cattle- Pray for relief measures.
Ref:- Our petition dated 9.9.52.

--

We the under signed public of Oojini and its surrounding villages beg to bring to your kind persual the foregoing few lines and pray for early and appropriate relief measures to the general public of this village and its surroundings.

There is no rain these parts since 34 months and sowings were half done before that time. The half sown crops with a little drizzling at times are drying and are at the point of dying, and the Public with expectation of the rain God are getting disappointed day to day. Almost half of the land is barren for want of rain they are not sown at all. It is almost half the rainy season and there is little hope of getting any crop this season, for most of the 9000 acres of cultivated land of this village is red soil and we don't depend on 'Hingari' crop.

There is no work for the poor and the Haves are not bold enough to lend the poor money (for there is no money available with Haves) and they are feeling too difficult to eke out their livelihood.

Though there is grains available in abundance poor have no capacity for purchasing due to unemployment.

As for cattle there is fodder nor there is grass for no rain. Even in forest nearby there is no grass. Cattle stock are made to half starving.

There is also water scarcity in some of the surrounding village.

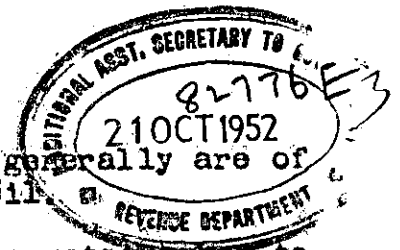

Hence in view of the failure of rains and in view of the drying crops of the half sown and the barren land we expect no crop this season. So we pray for declaring these parts as famine area and order us relief measures by ordering repairs of tanks and beginning of Famine Roads.

We beg to suggest the following relief measures:

1. To begin the repairing of the Harapanahalli Rayadurg Famine road passing this village, for it is already in formation and also it is quite essential to these parts.
2. To divert Kowlahalla in to the present tank- or ~~or~~ divert some other into the present tank, or
Order for a new tank across the course of the Kowlahalla for Appargat.
3. Or order some other relief work that may be feasible and workable in these surroundings.
4. Or order the formation of a new Road Oojini to Hosahalli.

We also propose the following reliefs.

- I. To permit the public for getting for cattle "Asina Poppalu" type of small leaves grazable by cattle in these parts available in Reserve forest and also import us fodder for the cattle.
- II. To order for remission of land revenue and cess.
- III. To sanction takavi loans to most of the agriculturalists and agriculturists.
- IV. To order some other

In general, we beg to state that our parts generally are of
not rain- fall and this season that too is Nil.

We feel sorry to state that our condition is getting bad to
worse day to day and our parts are to become a burden of expenditure
this state of already burdened with heavy financial expenditure.

We are not in a position to stand on our own legs and the Rain God
has made us to press for such relief stated above.

We pray you, sir, to be kind enough to consider our case- calmly
and sympathetically and render us all possible help and relief
at this critical stage.

H. S. W. I.
